There are also other invertebrates like mites and nematodes, bacteria, phytoplasmas, water molds, plants (mistletoes) and viruses that can cause damage and need to be avoided through biosecurity measures. Learn how to report signs of dangerous tree pests and diseases.

For the UK the Forestry Commission's TreeAlert which can be found at: www.forestry.gov.uk/treelert

In Ireland and Northern Ireland use TreeCheck which can be found at: www.treecheck.net

Cases of ill health found in trees across the UK and Ireland should be reported through:
